This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau.

All denominators use US Census data from 2002.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**

2a None

Age: None

Race: Because the Medicaid state agency is separate from the department of health, Hawaii's penetration rates are lower than those states where the department of health also serve as Medicaid agency.

Overall: AMHD is transitioning to a new database system and the present report was generated using the old system. Because of this transition, we were unable to include consumers who were served only by POS providers. This explains the drop in consumer served from FY2002.

2b None

Age: None

Race: None

Overall: CAMHD services have undergone major reorganization during the period reported. Beginning in FY'02, CAMHD transferred less intensive educationally-related, outpatient service and services to youth with Pervasive Developmental Disorders to the Dept. of Ed. Less intensive medically necessary, outpatient MH services for the Medicaid population are provided through the Medicaid health plans. As of FY'03, CAMHD provides intensive MH services to these education-and health-related populations, and provides a full array of services to youth in detention home or incarcerated at the HI Youth Correctional Facility.

**State Notes:**

Family Guidance Centers record primary, secondary, and tertiary diagnoses on axis I and primary and secondary diagnoses on Axis II of DSM-IV. Practice standards require youth to receive annual comprehensive mental health assessments that include a diagnosis. Analyses were based on the most recent diagnostic information recorded in our MIS system. Two dichotomous variables were calculated to represent if each youth received any (primary, secondary, or tertiary) mental health diagnosis or substance-related diagnosis, and these variables were cross-tabulated to yield the final results.

CAMHD has been expanding services to juvenile justice through its Family Court Liaison Branch. Provision of universal services to youth in Detention Home and incarcerated at the characteristics, as has the transfer of less intensive outpatient services to the Dept. of Ed. School-Based Behavioral Health Program beginning in FY02.

Mental Health Adults in Labor Force is the sum of MH consumers employed plus unemployed.

Adults Served in Community excludes persons for whom employment status was unknown.

MH Consumers Employed as % of Total Adults Served uses Adults Served as the denominator.

MH Consumers Employed as % of Adults served in Labor Force uses persons employed or Unemployed as the denominator.

This table uses data from URS/DIG Table 4.

**State Notes:**

"Data for CAMHD consumers age 18-20 were not included in this table."
